

Case Study

Pump Shed Installation

- Location:** Rural Pump Shed
Product Used: Europress Stainless Steel Press Fit Pipe System
Application: Supply water for irrigation
Pipe Sizes: ½" (15mm) through to 3½" (88.9mm) Stainless Steel

Director at Professional Farm Services, Steve McMillan, is thrilled with another excellent stainless steel Europress press-fit installation in a rural pump shed. The speed of installation in using Europress resulted in a reduced installation time, benefiting both the installer and the Property owner.

The system was installed to supply water for irrigation and three lifestyle properties with the ability for the pumps to be able to work together in the event of one failing. A majority of the pipework was completed in 88.9mm, and we at Waterworks could say this is one of the best pump sheds in New Zealand, complimented by high quality pipework. Well done to Steve and the team at Professional Farms!

During Europress Pipework Installation:

"All done in 6 hrs...was an empty shed at 11:00 and I left at 17:00. Fast product to use." - Steve

Completion of Europress Installation:

"Europress stainless work in the shed took less than two days by one guy." - Steve
