

Certificate of Conformity

This certificate confirms that the Europress Press Fit Piping System is suitable for applications using Industrial Grade Oxygen up to the pressure rating of 16 Bar or 232 PSI under the following parameters:

- The specified and marked Europress Gas Rated (Yellow) Press Fit Fittings must be used.
- Europress Gas approved 316L Stainless Steel Tube must be used.
- Standard Gas Rated HNBR O-rings must be replaced with EPDM or Viton O-rings prior to installation.
- Industry standard pipe cleaning processes must be used to clean all pipework after installation to remove any potentially hazardous residue in the pipeline BEFORE oxygen is allowed to enter the system.
- Correct installation and system design specifications must be followed as outlined in the Europress Technical Manual.
- The system should be pressure tested in accordance with the relevant AS/NZS Gas Code procedures.
- Europress approved pressing tools must be used.
